Introduction

A job portal is an online platform designed to connect employers and job seekers. This project aims to create an efficient and user-friendly system where users can post and search for jobs, and companies can manage their recruitment process seamlessly.

bit of body text

Objectives

- To provide a platform for job seekers to find suitable jobs.
- To allow companies to post job vacancies and filter applications.
- To implement an easy-to-use interface for job search, application, and management.
- To automate and optimize the recruitment process.

HOME PAGE DESCRIPTION:

The Home Page of the job portal serves as the entry point for users. It includes:

Header Section:

Site title: DESIRE JOBS.

Navigation links : Login, Jobs, About, and Contact pages.

A brief description encouraging users to search for jobs, apply online, and get hired.

Job search functionality with two input fields:

1.Job title/keywords.

2.Location.

*Search button to display relevant job results.

Featured Jobs Section:

Displays a curated list of popular job categories with clickable buttons leading to detailed pages:

1.Web Development

2.Travel Management

3.Data Analysts

4.Chef/Cooking

5.Chartered Accountant

6.Medical

Footer Section:

Divided into three columns:

Quick Links: Navigation to key pages.

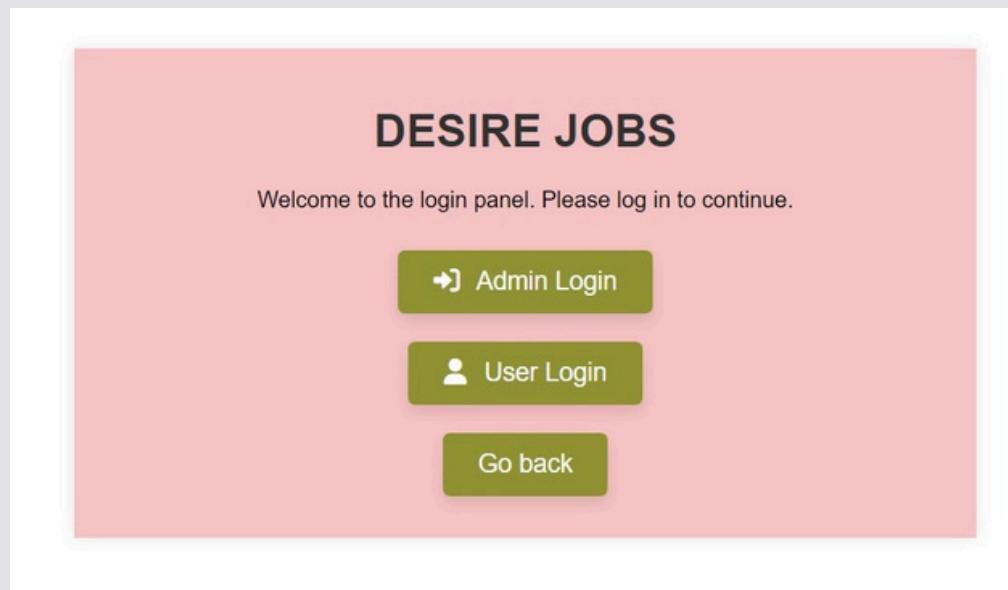

Extra Links: Options to log in or register.

Follow Us: Links to social media platforms (Facebook, Twitter, Instagram).

*Copyright information: "© 2024 DESIRE JOBS Portal."

The Home Page is designed to be user-friendly with an intuitive layout, responsive design, and clean navigation to ensure users can quickly find what they are looking for.

Login

LOGIN PAGE DESCRIPTION

The Login Page provides secure access for both administrators and users of the portal. It includes:

- A Welcome Section with a heading and brief instructions: "Welcome to the login panel. Please log in to continue."
- Two primary login options:
 - Admin Login: Provides access for administrators to manage the portal and perform administrative tasks.
 - User Login: Allows job seekers or employers to log in and access their respective dashboards.
- A Back Button: Offers navigation back to the Home Page for user convenience.

The design ensures a clean and minimalist user experience, enabling quick navigation for users and administrators alike.

Admin login

The screenshot shows two windows side-by-side. On the left is the 'Admin Login' page, which has a header 'Admin Login', a 'Username:' field with placeholder 'Enter username', a 'Password:' field with placeholder 'Enter password', a purple 'Login' button, and a purple 'Go back' button. On the right is a MySQL database interface showing a table named 'admin'. The table has columns: id, username, email, password, and created_at. There are 9 rows of data, each with an edit, copy, and delete link. The data includes various admin accounts like 'admin1@gmail.com' and 'shashi54@gmail.com' with their respective IDs and creation dates.

ADMIN LOGIN PAGE DESCRIPTION

The Admin Login Page is a dedicated section for the admin to control the website.

It features:

- Login Form:
 - Input Fields:
 - Username: Text input for entering the admin's unique identifier.
 - Password: Secure password input masked for privacy.

User Login

USER LOGIN PAGE DESCRIPTION

The User Login Page is a dedicated section for job seekers or employers to securely access their accounts. It features:

1. Login Form:

- o Input Fields:
 - Username: Text input for entering the user's unique identifier.
 - Password: Secure password input masked for privacy.

2. Options Section:

- o Remember Me: A checkbox allowing users to stay logged in on the device.
- o Forgot Password: A link redirecting to a password recovery page for users who need assistance accessing their account.

3. Login Button:

- o A clearly highlighted button to submit login credentials securely.

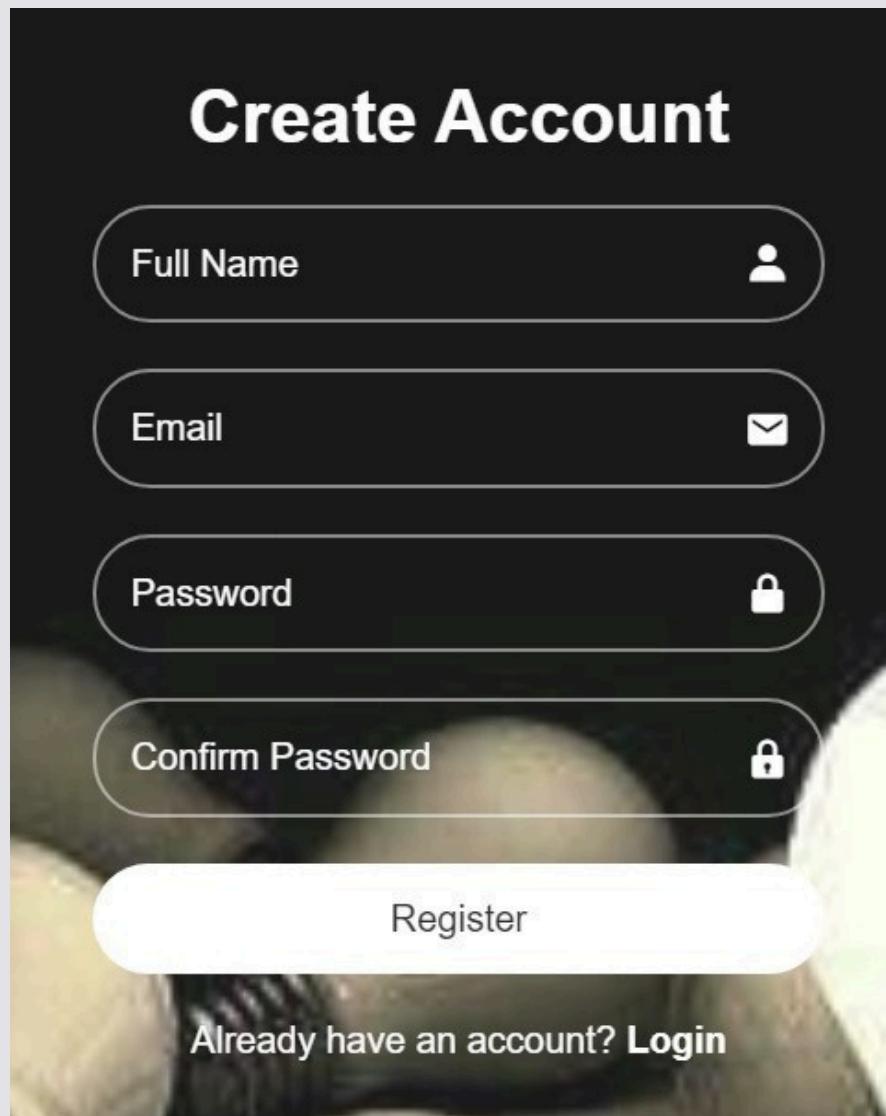

4. Navigation Links:

- o Back Button: Navigates back to the main login page for convenience.
- o Registration Link: Redirects new users to the registration page to create an account.

5. Design and User Experience:

- o The form is centralized with a clean, modern, and responsive layout ensuring ease of use across devices.
- o A simple color scheme and structured layout contribute to a smooth and intuitive user experience.

REGISTRATION PAGE DESCRIPTION

The registration form's design promotes ease of use and clarity, making the process of creating an account straightforward for users. The use of icons and the structured layout enhance the overall user experience, ensuring that users can navigate and complete the form with minimal effort.

The screenshot shows the 'About' section of the Desire Job Portal. At the top, there is a blue header bar with the 'DESIRE JOBS' logo and navigation links for 'HOME', 'JOBS', and 'CONTACT'. Below the header, the word 'About' is written in a large, stylized, pink font. The main content area has three sections: 'Who We Are', 'Our Mission', and 'Meet Our Team'. The 'Who We Are' section contains a brief mission statement. The 'Our Mission' section also has a mission statement. The 'Meet Our Team' section features three team members with their names and titles: Hure Jannat Tasnim (CEO), Tasnia Ayman Nuha (CTO), and Nuzhat Tasnim Chowdhury (Head of HR). Each team member has a small profile icon.

ABOUT PAGE DESCRIPTION

The "About Us" page of Desire Job Portal effectively outlines the purpose and mission of the platform. It introduces the portal as a comprehensive solution for job seekers to find opportunities and connect with employers across various industries. The page highlights its mission to provide a seamless and empowering job search experience, enabling users to apply effortlessly and advance their careers.

Contact

The screenshot shows the 'Contact Us' page of the Desire Job Portal. The header features the 'DESIRE JOBS' logo and a 'Contact Us' button, along with navigation links for 'HOME', 'JOBS', and 'ABOUT'. The main content area is titled 'Get in Touch' and includes a message encouraging users to contact them if they have any questions or need support. It provides two contact methods: a phone number (+8801856473284, +8801613842943) and an email address (support@desirejob.com). Below these, there are three input fields for 'Your Name', 'Your Email', and 'Your Message', each accompanied by a small icon. At the bottom, there is a red 'Send Message' button.

Showing rows 0 - 4 (5 total, Query took 0.0005 seconds.)

CONTACT PAGE DESCRIPTION

The Contact Us page of Desire Job Portal is designed to facilitate communication between users and the platform. It provides multiple contact options, including phone numbers and email addresses, ensuring accessibility for users seeking support or assistance. The page features a clean, user-friendly layout with a contact form for direct inquiries. Users can submit their name, email, and message, making it easy to reach out for job-related queries or help.

The page also includes social media links to Facebook, Twitter, and Instagram, allowing users to stay connected and informed about updates. The footer offers quick navigation to other pages such as Home, About, Jobs, and Login.

Overall, this page enhances the user experience by providing clear communication channels and offering a straightforward means to contact the Desire Job Portal team.

JOB PAGE DESCRIPTION

The Job Listings page of Desire Job Portal is designed to help users find suitable job opportunities through a clean and intuitive interface. The page offers a search bar for quick job searches and filters that allow users to refine results by job type, salary range, experience level, location, and sorting preferences (e.g., relevance, date posted, salary, or company name).

The page dynamically displays a list of job postings, including details such as job title, type, salary, experience level, location, posting date, and company name. Each job listing has a link to apply for the position.

The database ensures that job data is consistent, accessible, and easy to update. It supports the dynamic rendering of job listings on the page, making the search and filtering features functional.

When users apply filters, such as job type or salary range, queries are made to the database to retrieve matching job entries and display them accordingly. This makes the job search experience seamless and personalized for the user.

Application Form

Name:

Email:

Upload Resume:

No file chosen

APPLY PAGE DESCRIPTION

The Job Application page on the Desire Job Portal allows users to submit applications for their desired jobs. The page includes an application form where users are required to provide their name, email address, and resume (in file format). Upon submitting the form, the user's application is processed, and they are considered for the position they applied for.

Form Details:

- Name: The applicant enters their full name.
- Email: A valid email address is required for correspondence.
- Resume: Users can upload their resume in a file format (e.g., PDF, DOCX).
- Submit Button: Upon completing the form, the user clicks the Submit Application button to send the application.

Database Integration:

The database plays a crucial role in storing and managing job applications. It ensures that the user's data is securely saved and accessible for further actions. The backend may include:

- Applications Table: This table stores application details, including applicant's name, email, the position they applied for, and a link to their uploaded resume.
 - Columns may include: application_id, job_id, user_id, name, email, resume_link, and application_date.
- Job Listings Table: The application form is linked to specific jobs listed on the platform, with the Job ID used to associate each application with a particular job opening.

When a user submits an application, their information is saved into the applications table in the database, and the job ID of the job they are applying for is also stored. This allows for easy tracking and management of applications. The data can be accessed later by administrators or employers to review applicants for the positions.

User Interaction and Data Flow:

- The application data flows from the front-end (user input in the form) to the back-end database, ensuring that all applications are stored systematically for easy review.
- The resume file uploaded by the applicant can be stored in the file storage system, with the resume_link in the database pointing to its location.

In summary, this Job Application form efficiently collects user data and stores it in the database, supporting the overall functionality of the job application process on the Desire Job Portal.
